

Notes

1. Ensure positive drainage towards scupper. Drainage in the immediate area around the scupper may be facilitated by incorporating a sump into the insulation components.
2. This detail does not include a cant strip. If a cant strip is used, flash as per typical details.
3. The Flex SBS Modified Membranes are applied in hot asphalt or in Flex's Cold Adhesive. Consult Technical Data Sheets for specific information as well as priming requirements.

Flex SBS Modified Roofing Systems

SCUPPER

CONVENTIONAL ROOFING ASSEMBLY

Scale: N.T.S.

Plot: 1:5

Issued: 08/07

Revision: KF
