

OlyBond500

SpotShot
ADHESIVE FASTENER

FAST. SAFE. EASY.

Product Description

OlyBond500 is a fast acting, dual-component, low-rise urethane foam adhesive designed to attach insulation to roof decks. OlyBond500 is dispensed through a portable 1:1 SpotShot applicator, and is perfect for crickets, smaller roofs, hard-to-reach areas, and repairs. OlyBond500 does not create any odors or noise that might disturb building occupants.

Application

OlyBond500 is applied in bands 12" on center, and allowed to rise prior to laying the insulation in place. OlyBond500 securely adheres to structural concrete, gypsum, cementitious wood fiber (Tectum®), lightweight concrete, steel and wood roof decks. It can also be used over smooth surface BUR, smooth and granular surface modified bitumen membranes, base sheets, and some vapor barriers. Contact Flex for application details.

Coverage

400-600 square feet per case.

Storage

Product must be stored upright, at room temperature, and kept from freezing at all times.

Approvals

OlyBond500 is included in many approved roof assemblies listed with Factory Mutual Systems and Miami Dade County. Contact Flex for application details.
